Description			
<p>Certain SIM links in the GRE product contain video sets (e.g: https://app.entrayn.com/learning/sim/1f77af2e-61f7-40c0-9167-ca00308b6e00). When the student clicks on these links for the first time, he or she will only see the first video. To see the remaining videos, the students have to click on the orange "Got It" button that appears after each video on the left-hand side. Since the students do not know that they need to click on the button to access the hidden videos, a lot of our students miss out on some of the videos in these sets.</p> <p>[To confirm, I switched user and checked for three users: Sucharitha (865721), S. Raveer (857245), and Ishita Goyal (864964). All three users had this problem.]</p> <p>Ideally, the button should only appear at the end. For example, if a SIM link has 3 videos, then the button should appear only after the third video. So, when a student opens such a SIM link, he/she should be able to see all 3 videos. And once he/she has gone through all three videos, he/she should be able to click on the "Got It" button.</p> <p>Earlier, I had raised this issue as a feature request (Feature #2252) by mistake.]</p>			

History
