Please check this too .

Not sure if these questions where these questions are picked from .

As far as I know mobile app questions are in question bank beta so when we search with tags QB and safe for ios we get those questions .

This is the second issue in one week in mobile app.

The question on Mobile app :

gluid :15542

The original question and answer choices :

<http://entrayn.com/node/1342/questionbank-beta#15542>

and even the explanation seems to be wrong in the mobile app different from one what we have on Qbeta .

please see the attached images .
