History

#1 - 09/11/2024 01:56 PM - Sindhuja QA

- Status changed from New to Observation
- Priority changed from High to Normal

This is not an issue. The mobile GRE app and website GRE questions are merged to provide an overall score in the preparedness level. If the student answers a question correctly, it should not appear again. However, questions that were answered incorrectly will reappear, which is why the student assumed that the question count was not increasing.
