factor:	Unclear / Missing / Incorrect product Requirements		

Description

<https://app.entrayn.com/summary/2f3f6c88-6270-47ba-b47e-462ce0f7675b/screen/8>

Explanation

Four of these points are joined to each of the remaining six points

a,b,c,d are joined to e,f,g,h,i,j each

Number of segments =  $4 \times 6 = 24$

Each of the remaining six points is joined exactly to five points

Remaining six are already joined with four points.

ie.,The remaining 6 points (e,f,g,h,i,j) are already joined to those 4 points (a,b,c,d). We need 1 more for those 6 points.

Thus only two not joined points can be used to make a line segment

History

#1 - 07/02/2025 06:30 AM - Sindhuja QA

- factor Unclear / Missing / Incorrect product Requirements added

This issue has been fixed.

#2 - 07/02/2025 06:30 AM - Sindhuja QA

- Status changed from New to Resolved
