Description

The verbal instructors are **sometimes** finding it difficult to submit the students' AWA grades using the GRE AWA tool. When these results do not get submitted, we have to score the essays multiple times. Sometimes, even if the AWA tool shows that the scores have been submitted, it is not reflected in the learner's results page (e.g.: Omi Wakode -- 748329 -- MT1 Argument Essay). At times, we are also finding it difficult to load the data population sheet [http://entrayn.com/populate_awa_data/27905/593746].
